Endoscopic Dacryocystorhinostomy

Synopsis

Meticulous research and long hours of dedicated labour has been undertaken in the preparation of this book on endoscopic DCR and other lacrimal sac procedures the anatomy of lacrimal apparatus and various pathologies and their management has been systematically dealt within the subsequent chapters. Preoperative investigative procedures have been discussed in detail for detecting the site of block. Emphasis has been placed on the success of endoscopic technique that is used to treat lacrimal sac disorders. The steps are made easy with the help of clinical and schematic diagrams including a video of the surgical steps. The layout of the procedure will make it easier for the eye and ENT surgeons to follow the technique.
