Aligning Values And Politics: Empowerment Versus Entitlement

Synopsis

Aligning Values and Politics argues that empowering individuals for self-actualization is an indispensable tool for attaining freedom; therefore, politics must align with the promotion of self-actualization. Private property rights have in the past helped people to develop skills, but such rights were abused. Once these rights are combined with an ethics of responsibility, the book opens the doors to a nonpartisan analysis of income inequality, inheritance, race relations, abortion and governance. The book argues that the American government is engaged in producing à œbread and circuses,• inducing people into living vicariously. Using the ideas of Immanuel Kant, the authors claim that we can return to a civil society that values independence rather than entitlements.
