Botox, Dysport, Dermal Fillers and Sclerotherapy, part of Milady’s Aesthetician Series, discusses the hottest procedures in the non-surgical aesthetics industry today. This resource looks into each and every aspect of these exciting procedures, including patient selection, patient satisfaction, and recovery time. All the reader’s questions will be answered and deep discussion of the differences and unique qualities of each procedure will lead to a complete understanding of these cutting edge processes. Many thorough case studies are included, as well as invaluable before and after photos that will allow the reader to see actual results, leading to an enhanced understanding of the material. Facial anatomy is also covered in the book, leading to an understanding of how the facial muscles interact and how the face ages. The reader will be able to determine the best course of action for each patient, how these techniques are better than surgery, and what the results will be. Chapters include the popular "Top Ten Tips to Take to the Clinic" feature, which offers professional aestheticians quick content review.

Customer Reviews

This is a good book. In fact, we bought all of the series and these are great books. Very concise yet contain enough information for an esthetician and those in medical esthetics. I think the cost is very reasonable as well. These are informative and easy read. Recommend.
This book did a great job of describing Botox in detail, and it's applications. The review of facial muscles and nerves was very good. For an esthetician or medical professional, this book is a great beginner resource!

A total waste of money. Very disappointing, ridiculous price. Gives no information of any value. Wouldn’t recommend it to anyone.

I was pleased with the basic knowledge this book offered - I was looking for a reference book to build my classroom syllabus from and this was a good addition. The students also like the hands on when checking out the book from the office library.

good
